

Assignment (Day 3)

Q). 1 Create an array called "fruits" with the following fruits: "apple", "banana", "orange", "grape", "mango".

Q).2 Use JavaScript to display the total number of fruits in the array.

Sol : // Create the "fruits" array

```
var fruits = ["apple", "banana", "orange", "grape", "mango"];
```

```
// Display the total number of fruits
```

```
var totalFruits = fruits.length;
```

```
console.log("Total number of fruits: " + totalFruits);
```

description :

- created a fruits array
- to determine the total number of fruits in an array we use length property of an array (fruits.length).
